

Profile Validation

LEVEL 1

Physical Validation

Physical validation begins when a profile validation specialist initiates a call to any company wishing to activate a profile on the Vendorin Network. We record a short conversation with a supervisory level contact then we send an e-mail containing a profile validation survey which must be completed before physical validation is finished and the company's profile becomes active on the Vendorin Network.

LEVEL 2

Automated Validation

Automated validation uses multiple sources to reconcile and validate information which has been provided during the profile activation process. Our automated validation process reviews basic company information, tax identification numbers, and bank account information. During this process we even interact with the Office of Foreign Asset Control (OFAC) to ensure that companies on the Vendorin Network are not blacklisted by the U.S. government.

LEVEL 3

Interactive Validation

Interactive validation begins when a profile validation specialist initiates a call to a profile holder's trading partner. We record a short conversation with a supervisory level contact in accounts payable or accounts receivable and then we send an e-mail containing a trading partner validation survey which has been designed to enhance profile validation through the interactive co-operation of each profile holder's trading partners.

LEVEL 4

Recurring Validation

Recurring validation is the process of repeatedly applying our automated and interactive validation methods during the life of each profile on the Vendorin Network. We then supplement these validation processes with a survey based methodology for confirming the accuracy of profiles on the network and enhancing the information contained within profiles on the network.

Do Business With Confidence

With Vendorin, you can do business with confidence knowing we are taking extraordinary steps to ensure your business activities are supported with accurate and up to date trading partner information.
